Subject: Volunteers Needed for Katrina

Indiana Department of Homeland Security, Emergency Response Division is trying to assemble communications teams to be deployed to the areas that were affected by hurricane Katrina. We realize that this is a growing problem with communications in the areas especially the health and welfare concerns. The state of Indiana will be funding this endeavor and all operators should use their own equipment, food, water etc as listed in the ARES Emergency Supply List. A small generator will be given to each station so they can operate effectively in the remote locations.

If you hear of people wanting to volunteer for this needed service please have them contact me. I have also contacted our state ARES Emergency Coordinator, Dave Pifer N9YNF about this need and he will be contacting all Indiana EC's.

DHS is also sending it's Mobile Command Center Saturday

Thought you might like to know of our efforts concerning this devastating hurricane.

Sincerely,

Robert E. LaGrange
